Propel

Propel Service Consumption Table

Effective: August 1st, 2023

Generally. The Propel Service is a cloud data platform provided by Propel Data Cloud Inc ("**Propel**", "we", "us", "our") to Propel customers (each a "**Customer**", "you", "your") as a service which consumes resources for distinct functions as set forth herein and is available in several different geographical regions ("**Regions**"), as described more fully in the Documentation. Customer can ingest their own data into Propel ("**Customer Data**"). Customer can create and manage the Customer Data with Data Pools ("**Data Pool**") on the Propel Service ("**Account**"). Customer can optimize query performance with Boosters ("**Booster**") on the Propel Service ("Account"). Customer can query Customer Data ("**Query Data Processed**") at a given speed determined by a given Propeller ("**Propeller**") on the Propel Service ("**Account**").

Data Pools. Data Pool pricing is calculated based on the total gigabyte hours for all stored Data Pools in your Propel Account. Every hour, Propel measures the gigabytes stored in each Data Pool and multiplies it by the Data Pool GB-hour price to determine the storage consumption.

Boosters. Booster pricing is calculated based on the total gigabyte hours for all stored Boosters in your Propel Account. Every hour, Propel measures the gigabytes stored in each Booster and multiplies it by the Booster GB-hour price to determine the storage consumption.

Propellers. Propeller is the speed at which queries are processed. Each Propeller corresponds to a speed and a price (see table below).

Query Data Processed. Query Data Processed is based on gigabytes of data processed to serve all queries in your Propel Account in the month. The Query Data Processed will be displayed in the Propel Service. The monthly charge is based on the total data processed across the number of calendar days in that month.

On-Demand Pricing. The Customer may be subscribed to on an On Demand basis, where usage is invoiced in arrears every month, or on a Capacity basis, where a set dollar amount of usage is purchased upfront. Pricing depends on whether you are on an On Demand or Capacity basis. Capacity pricing is determined by a discount specified in the Order Form off the On-Demand prices. Prices are in U.S. dollars (USD).

Region: US-EAST-2 On-Demand Pricing

Compute GBs processed in Queries			Storage Data stored in Data Pools and Boosters	
Propeller	**Max records per second**	**Price per GB**		Price per GB-hour
P1_X_SMALL	1,000,000	$0.03	Data Pools	$0.0035
P1_SMALL	10,000,000	$0.05	Boosters	$0.0085
P1_MEDIUM	100,000,000	$0.10		
P1_LARGE	250,000,000	$0.15		
P1_X_LARGE	500,000,000	$0.25		

Additional Accounts. You may request additional Accounts through the Propel Service or by filing a support ticket.

Changes to this Propel Service Consumption Table. This Propel Service Consumption Table may be updated from time to time. Propel will use reasonable efforts to provide advance notice via email or through the Propel Service of material changes, but the changes shall be effective on the date that Propel announces they are effective. If any change materially increases prices, you may terminate the applicable Order Form upon written notice to Propel and receive a refund of any prepaid and unused Capacity you purchased. This Propel Service Consumption Table applies to Previews, provided that Private Previews may be subject to different pricing, as may be set forth in the Private Preview Documentation.

Any capitalized terms used but not defined herein shall have the meaning set forth in the Agreement or the Documentation, as applicable.
